RADHIKA DUBEY

PRODUCT MANAGER | BUSINESS ANALYST | PRODUCT ANALYTICS

Dallas, Texas | +1 2142187092 | Radzzdubey214@gmail.com | Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Product Manager with 4+ years of experience spanning product requirements, business analysis, data analytics, and Agile delivery across technology, retail, and digital environments. Experienced in translating business and user needs into product requirements, user stories, acceptance criteria, UAT scenarios, and measurable product improvements. Strong in SQL, product analytics, KPI analysis, and root-cause investigation, with experience partnering cross-functionally with product, engineering, UX, marketing, and operations teams to deliver reliable features and improve product outcomes.

PROFESSIONAL EXPERIENCE

Product Manager **July 2025 – Present | TX, USA**

Holiday Channel

- Drove product requirements for an AI chat assistant on Holiday Channel's e-commerce and media platform, translating enterprise customer needs into clear requirements and coordinating priorities across development teams.
- Owned end-to-end coordination for an AI-powered chatbot, communicating requirements, dependencies, and feedback between development teams while supporting enterprise customer interactions throughout feature development and release.
- Led cross-functional collaboration with engineering and content teams to define chatbot workflows, clarify implementation requirements, and align AI feature delivery with the overall platform experience.
- Gathered and clarified enterprise customer requirements, converting feedback and use cases into user stories, acceptance criteria, and actionable inputs for development teams.
- Coordinated feature development across multiple teams by tracking dependencies, resolving requirement gaps, and maintaining alignment between product expectations and technical implementation.
- Supported UAT and release activities for chatbot features by reviewing test scenarios, validating expected outcomes, documenting issues, and coordinating fixes with development teams.
- Reviewed chatbot interactions, customer feedback, and product usage patterns to identify workflow gaps and recommend improvements to the AI-powered user experience.
- Maintained product documentation, feature requirements, workflows, and release updates while coordinating stakeholder feedback through the product development lifecycle.

Web Analyst Intern **April 2024 – May 2025 | TX, USA**

The University of Texas at Dallas (JSOM)

- Gathered web analytics and reporting requirements from Digital Services, UX, and Marketing stakeholders, translating business questions into measurable metrics, reporting needs, and analytical requirements.
- Used SQL to validate multi-source website datasets, identify data inconsistencies, and build repeatable anomaly-detection checks that supported reporting accuracy of approximately 99.9%.
- Analyzed website behavior using CTR, bounce rate, session duration, scroll depth, and other engagement metrics to identify user drop-off patterns and recommend improvements to digital experiences.
- Conducted A/B tests across webpage layouts, calls-to-action, and banners, comparing engagement results to identify higher-performing variations and provide evidence for UX improvement decisions.
- Built recurring analytical reports and dashboards to monitor website performance trends, giving Digital Services and Marketing stakeholders clearer visibility into user behavior and content performance.
- Investigated changes in traffic and engagement metrics by comparing page-level performance, user behavior, and campaign-related trends, translating findings into actionable recommendations for stakeholders.
- Supported SEO-focused webpage improvements by reviewing page structure, content organization, and analytics trends, helping teams identify opportunities to improve website effectiveness and user engagement.
- Documented analytical findings, metric definitions, testing results, and recommendations so stakeholders could use consistent data when evaluating website performance and prioritizing future improvements.

System Engineer **July 2021 – December 2022 | India**

Tata Consultancy Services (Client: Kroger)

- Managed Jira and ServiceNow tickets covering system defects, integrations, operational issues, change requests, and customer-reported incidents, building a strong foundation in enterprise application support and issue management.
- Analyzed ticket volumes by defect type, priority, severity, and resolution timeline to identify recurring patterns and provide structured inputs for root-cause analysis and operational improvement.
- Investigated application and integration issues by reviewing logs, reproduction steps, system behavior, and business impact, providing engineering teams with clear information needed to diagnose and resolve defects.
- Coordinated incident escalation and follow-up for high-impact issues, maintaining approximately 98% SLA compliance while keeping stakeholders informed of status, priority, and resolution progress.

- Worked with engineering and support teams to validate defect fixes, reproduce reported issues, and confirm that system changes addressed the original business and technical requirements.
- Improved ticket-handling workflows by organizing incident information, escalation details, and resolution documentation, making recurring issues easier to identify and track across support cycles.
- Prepared operational reports from Jira and ServiceNow data to give teams visibility into incident trends, backlog patterns, response times, and areas requiring additional investigation.
- Developed a practical understanding of enterprise systems, SDLC processes, production support, defect management, and cross-functional delivery that later supported the transition into analytics and product-focused responsibilities.

TECHNICAL SKILLS

Product Management: Product Requirements, Product Discovery, Feature Requirements, Backlog Prioritization, User Stories, Acceptance Criteria, KPI Definition, Release Readiness, UAT, Agile, Scrum

Business Analysis: Requirements Gathering, Business Requirements, Gap Analysis, Process Mapping, AS-IS/TO-BE, Workflow Analysis, Requirement Clarification, Functional Analysis, Root-Cause Analysis

Data & Analytics: SQL, Data Analysis, Data Validation, Data Reconciliation, Anomaly Detection, KPI Analysis, Trend Analysis, Behavioral Analysis, A/B Testing, Advanced Excel

Product & Web Analytics: Google Analytics, User Behavior Analysis, CTR Analysis, Bounce Rate Analysis, Session Analysis, Scroll Depth Analysis, Funnel Analysis, Conversion Analysis, SEO Analytics

BI & Reporting: Tableau, Power BI, Dashboard Development, Reporting, Data Visualization, Metric Dictionaries, Operational Reporting

Tools & Delivery: Jira, Confluence, ServiceNow, Figma, MS Project, Test Cases, Defect Management, Release Support, Technical Documentation, Stakeholder Management, Cross-Functional Collaboration

Domains: Retail, E-Commerce, Product Operations, Digital Analytics, Logistics, Supply Chain, Web Analytics

Certifications: AWS Cloud Practitioner, Microsoft Azure Fundamentals, Alteryx Core, McKinsey Forward Program

EDUCATION

The University of Texas at Dallas — **Richardson, TX, USA**
M.S. in Information Technology & Management — **May 2025**

Banasthali University — **India**
Master's in Computer Application — **May 2021**
