RADHIKA DUBEY

BUSINESS ANALYST

(214)-218-7092 | Dallas, Texas | radzzdubey214@gmail.com | linkedin.com/in/radhikadubeypm/ | Portfolio

PROFESSIONAL SUMMARY

Business and Data Analyst with 4+ years of experience across technology, retail, digital platforms, and logistics. Experienced in gathering and translating business requirements and customer needs into actionable insights, user stories, and process improvements. Skilled in SQL, Advanced Excel, KPI analysis, dashboard reporting, data validation, and root-cause analysis to support data-driven decision-making. Collaborates with business stakeholders, engineering, UX, and customer-facing teams to clarify requirements, support UAT, improve customer experiences, and strengthen business performance.

PROFESSIONAL EXPERIENCE

UniUni Logistics Inc. **Jun 2026 – Oct 2026**

Operations Assistant TX, USA

- Analyzed historical delivery data, booking volumes, and driver capacity to identify operational trends, assess service gaps, and recommend improvements to delivery performance and reliability.
- Developed and maintained Excel reports tracking on-time delivery, route performance, shipment volumes, and capacity utilization, reducing reporting preparation time by 12% through improved reporting workflows.
- Validated and reconciled data across shipment manifests, Bills of Lading (BOL), and booking records to identify discrepancies, resolve data inconsistencies, and improve business reporting accuracy.
- Gathered and clarified operational requirements from delivery service partners and drivers, translating booking requests, capacity constraints, and service concerns into actionable recommendations for internal teams.
- Investigated delivery delays, failed deliveries, and booking discrepancies by analyzing dispatch logs and delivery timestamps, helping reduce issue resolution time by 15% through root-cause analysis and corrective actions.
- Coordinated with internal teams to investigate shipment-related issues, address operational requirements, and communicate resolution updates to delivery service partners and drivers.
- Consolidated recurring partner feedback and operational issues to identify workflow gaps, document findings, and recommend process improvements across delivery operations.

Holiday Channel **Jul 2025 – Jun 2026**

Product Manager TX, USA

- Translated enterprise customer needs into business requirements for an AI-powered chat assistant on an e-commerce and media platform, clarifying expectations and coordinating development priorities across teams.
- Managed cross-functional requirement coordination throughout chatbot development and release, communicating dependencies, stakeholder feedback, and implementation updates to maintain alignment across development teams.
- Analyzed chatbot workflows with engineering and content teams, clarifying implementation requirements and aligning feature functionality with customer needs and overall platform objectives.
- Gathered and analyzed enterprise customer requirements, translating business use cases and feedback into user stories, acceptance criteria, and actionable development requirements.
- Evaluated feature dependencies and requirement gaps across development activities, coordinating with multiple teams to maintain alignment between business expectations and technical implementation.
- Supported User Acceptance Testing (UAT) and release activities by reviewing test scenarios, validating expected outcomes, documenting defects, and coordinating issue resolution with development teams.
- Analyzed chatbot interactions, customer feedback, and product usage patterns to identify workflow gaps and recommend improvements to functionality and the overall user experience.
- Maintained product requirements, workflow documentation, and release updates while incorporating stakeholder feedback throughout the product development lifecycle.

The University of Texas at Dallas (JSOM) **Apr 2024 – May 2025**

Web Analyst Intern TX, USA

- Gathered and analyzed web analytics and reporting requirements from Digital Services, UX, and Marketing stakeholders, translating business questions into measurable KPIs, reporting requirements, and analytical specifications.
- Used SQL to validate multi-source website datasets, identify data inconsistencies, and develop repeatable anomaly-detection checks, supporting approximately 99.9% reporting accuracy.
- Analyzed website performance and user behavior using CTR, bounce rate, session duration, scroll depth, and engagement metrics to identify user drop-off patterns and recommend digital experience improvements.
- Conducted A/B testing across webpage layouts, calls-to-action, and banners, evaluating engagement metrics and comparing test results to identify higher-performing variations and support data-driven UX decisions.
- Developed recurring analytical reports and dashboards to monitor website performance KPIs, traffic trends, and content engagement, providing Digital Services and Marketing stakeholders with actionable business insights.
- Investigated fluctuations in website traffic and engagement by analyzing page-level performance, user behavior, and campaign-related trends, translating findings into actionable recommendations for stakeholders.
- Evaluated webpage structure, content organization, and SEO performance trends to identify optimization opportunities and recommend improvements to website effectiveness and user engagement.
- Documented analytical findings, KPI definitions, testing results, and reporting recommendations to maintain consistent performance measurements and support stakeholder evaluation and prioritization decisions.

Tata Consultancy Services (Client: Kroger) **Jul 2021 – Dec 2022**
System Engineer India

- Managed Jira and ServiceNow tickets covering system defects, integrations, operational issues, change requests, and customer-reported incidents, supporting enterprise application management and issue resolution processes.
- Analyzed ticket volumes by defect type, priority, severity, and resolution timelines to identify recurring patterns, support root-cause analysis, and provide insights for operational improvements.
- Investigated application and integration issues by analyzing system logs, reproduction steps, application behavior, and business impact, providing engineering teams with structured findings to support defect diagnosis and resolution.
- Coordinated incident escalations and follow-ups for high-impact issues, maintaining approximately 98% SLA compliance while communicating incident status, priorities, and resolution progress to stakeholders.
- Collaborated with engineering and support teams to validate defect fixes, reproduce reported issues, and verify that system changes addressed the original business and technical requirements.
- Improved ticket-handling workflows by organizing incident details, escalation records, and resolution documentation, making recurring issues easier to identify, analyze, and track across support cycles.
- Prepared operational reports using Jira and ServiceNow data to monitor incident trends, backlog patterns, response times, and operational performance, helping teams identify areas requiring further investigation.
- Gained practical experience with enterprise systems, SDLC processes, production support, defect management, and cross-functional delivery, building a technical foundation for subsequent analytics and product-focused responsibilities.

TECHNICAL SKILLS

Business & IT Analysis: Business Analysis, IT Business Analysis, Requirements Gathering, Business Requirements, Requirement Clarification, Requirement Documentation, Gap Analysis, Functional Analysis, Workflow Analysis, Process Mapping, User Stories, Acceptance Criteria, Root-Cause Analysis, UAT

Data Analysis & Data Quality: SQL, Advanced Excel, Data Analysis, Data Interpretation, Data Validation, Data Reconciliation, Data Quality Checks, Anomaly Detection, Data Accuracy, Trend Analysis, KPI Analysis, Performance Analysis, A/B Testing

Business & Operations Analysis: Business Operations Analysis, Operational Analysis, Process Improvement, Workflow Optimization, Capacity Analysis, Operational Performance Monitoring, Issue Analysis, Business Insights, Service Performance Analysis, Supply Chain Operations

Product Operations & Delivery: Product Requirements, Feature Requirements, Product Discovery, Backlog Prioritization, Release Coordination, Release Readiness, Agile, Scrum, Stakeholder Coordination, Cross-Functional Collaboration, Product Documentation

Digital & Web Analytics: Google Analytics, Web Analytics, User Behavior Analysis, CTR Analysis, Bounce Rate Analysis, Session Analysis, Scroll Depth Analysis, Funnel Analysis, Conversion Analysis, SEO Analytics, Customer Feedback Analysis

Reporting & Business Intelligence: Advanced Excel Reporting, KPI Reporting, Operational Reporting, Dashboard Development, Data Visualization, Performance Reporting, Metric Definitions, Tableau, Power BI

Customer Experience & Operations: Customer Operations, Customer Experience Analysis, Customer Feedback Analysis, Customer Issue Resolution, User Experience Analysis, Chatbot Interaction Analysis, Service Issue Investigation, Customer Support Coordination

Application & IT Support: Application Support, Incident Management, Ticket Management, Defect Management, Defect Tracking, SLA Monitoring, Issue Resolution, Change Requests, Jira, ServiceNow, Confluence

Tools & Technical Skills: SQL, Python, Microsoft Excel, Jira, ServiceNow, Confluence, Figma, MS Project

Industry Knowledge: Retail, E-Commerce, Logistics, Supply Chain, Digital Platforms, Product Operations, Web Analytics

Certifications: AWS Cloud Practitioner, Microsoft Azure Fundamentals, Alteryx Core, McKinsey Forward Program

EDUCATION

The University of Texas at Dallas Dallas, TX, USA
M.S. in Information Technology & Management May 2025

Banasthali University India
Master's in Computer Application May 2021

Banasthali University India
Bachelor's in Computer Application May 2019
